DETAILED ACTION

1. Claims 29-31 and 67-73 are pending in the instant application. Claims 29-31 and 67-70 have been amended as requested by Applicant in the Paper filed December 5, 2005.

Claims 67-73 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claims 29-31 are under examination.

Withdrawn Objections and Rejections

2. Any objection or rejection of record which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.

Maintained Rejections

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 29-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 29-31 are indefinite because they are drawn to an isolated oligonucleotide "specifically" hybridizable under moderate stringency conditions, equivalent to 40% formamide with 5X or 6X SSC. Applicants have amended the claims to replace "corresponding" to "equivalent" and therefore that part of the rejection has been overcome. Applicants on page 5 of

Art Unit: 1646

the response assert that the skilled artisan could experimentally determine equivalent conditions using his own buffers, washes and temperatures. However, as discussed in the previous office action, there are no temperatures or wash conditions recited, which are important in defining the hybridization conditions and therefore which nucleic acid molecules would hybridize, and therefore the claims do not clearly set forth the metes and bounds of the patent protection desired.

New Rejections or Objections

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 29 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 29 is indefinite because it encompasses an isolated oligonucleotide hybridizable to a. a DNA molecule of SEQ ID NO: 9 and, b. a DNA molecule that codes on expression for the soluble leptin receptor polypeptide encoded by *any* of the foregoing DNA molecules, and there is only one foregoing DNA molecule. The rejection would be overcome by deleting the word “any”. Additionally, “molecules” would need to be the singular “molecule”.

Art Unit: 1646

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5.1 Claims 29-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 29-31 recite “moderate stringency hybridization conditions equivalent to”, and there is no description in the specification for conditions “equivalent to”. This is a new matter rejection.

5.2 Claims 29-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims as amended have the limitation that the oligonucleotide does not hybridize under moderate stringency hybridization conditions to nucleic acid encoding the leptin receptor polypeptide of SEQ ID NO: 84. However, the specification has not described the subgenus of oligonucleotides that would bind to the DNA molecule of SEQ ID NO: 9 but not the DNA encoding the polypeptide of SEQ ID NO: 84.

It is believed that all pertinent arguments have been answered.

Conclusion

6. No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
